

SAYYAB ASHRAF

Software Engineer | Flutter Developer | React/Web Developer | QA Automation | DevOps

Rawalpindi, Pakistan | sayyabashraf354@gmail.com | 0317 1513318

Portfolio: sayyab.me | LinkedIn: linkedin.com/in/sayyab-ashraf | GitHub: github.com/sayyab2040

CORE COMPETENCIES

Flutter Apps	React Websites
Backend/APIs	QA Testing
CI/CD & Cloud	Databases
Tech Docs	Product Ops

TECHNICAL SKILLS

Mobile: Flutter, Dart, Android/iOS app UI, responsive screens, navigation, auth flows, dashboards, booking/listing apps

Frontend: React, JavaScript, HTML5, CSS3, Tailwind CSS, responsive web design, portfolio and landing pages

Backend: Node.js, Express.js, REST APIs, Supabase, MySQL, MongoDB, database connectivity

QA/Testing: Selenium WebDriver, Jira, SoapUI, Ranorex, API testing, test cases, bug reports

DevOps: Git, GitHub, Jenkins, Docker, Linux, Nginx, AWS EC2, SonarQube, Grafana, Prometheus

Tools: VS Code, Android Studio, Postman, Figma, GitHub, technical documentation

EDUCATION

BS Software Engineering 2022 - 2026
COMSATS University Islamabad

ICS - Cadet College Palandri 2019 - 2021

Matriculation - Cadet College Palandri 2017 - 2019

RELEVANT COURSEWORK

Mobile App Development, Software Testing, Database Systems, DevOps, Cloud Deployment, Operating Systems, Software Requirements & Design, Formal Methods.

SERVICES / ROLE FOCUS

- Flutter mobile app development
- React frontend and portfolio websites
- Manual QA and automation testing
- CI/CD, cloud deployment and monitoring
- API integration and database workflows

PROFESSIONAL STRENGTHS

- Practical problem solving and troubleshooting mindset.
- Clear documentation and communication.
- Fast learner with hands-on project execution.
- Understands development, testing, deployment and monitoring.
- Business awareness from e-commerce and product operations.

TOOLS USED

Flutter, React, Supabase, Jenkins, Docker, AWS EC2, Nginx, SonarQube, Grafana, Prometheus, Selenium, Postman, MySQL.

LANGUAGES

English, Urdu

WORK PREFERENCES

- Open to junior software, Flutter, frontend, QA and DevOps intern roles.
- Available for on-site/hybrid roles in Islamabad/Rawalpindi and remote opportunities.
- Portfolio and project details available at sayyab.me.

INTERVIEW STRENGTH

Can explain project architecture, app workflows, testing evidence, CI/CD steps, deployment issues and troubleshooting clearly.

PROFESSIONAL SUMMARY

Software Engineering graduate with hands-on experience across Flutter mobile app development, React/web development, backend/API integration, QA automation and DevOps workflows. I build responsive user interfaces, connect apps with databases/APIs, test software functionality and support CI/CD, deployment and monitoring processes. I am seeking a junior role where I can contribute to real software delivery while continuing to grow professionally.

EXPERIENCE

Software Engineer - Academic & Independent Projects

Jan 2024 - Present

- Developed application workflows including authentication, dashboards, booking/listing flows, profile screens, forms, API integration and database-backed features.
- Built mobile-first and web interfaces using Flutter, Dart, React, JavaScript, HTML, CSS and Tailwind CSS with focus on responsive user experience.
- Applied QA practices including manual test cases, Selenium browser testing, API validation, defect documentation and issue tracking.
- Practiced DevOps workflows using GitHub, Jenkins, Docker, Linux, AWS EC2, Nginx, SonarQube, Grafana and Prometheus for build, deployment and monitoring concepts.

E-commerce Product Research & Operations Assistant

2023 - Present

- Performed product research, supplier comparison, competitor analysis, listing optimization, keyword research and marketplace workflow support.
- Developed business awareness around product positioning, customer-focused listings and online selling operations.

SELECTED PROJECTS

TravEra - AI-Based Travel Planning & Booking Platform

FYP / Product Project

- Designed traveler/vendor workflows for AI itineraries, listings, bidding, bookings, reviews, messaging, weather, local events and emergency support.
- Worked on Flutter app screens, dashboard flows, marketplace-style vendor hub concepts and Supabase-backed feature planning.

Personal Portfolio Website

React / Vercel / SEO

- Deployed responsive portfolio at sayyab.me with custom domain, contact form, resume download, SEO metadata, sitemap and robots.txt.
- Improved mobile responsiveness, visual branding, project presentation and live deployment workflow.

CI/CD Pipeline & Cloud Deployment Workflow

DevOps / AWS EC2

- Implemented workflow using GitHub, Jenkins, Docker, Linux server setup, Nginx deployment, SonarQube quality checks and Grafana/Prometheus monitoring.
- Practiced troubleshooting build/deployment errors, server configuration, containerized services and technical documentation.

Software Testing & QA Automation Projects

Selenium / API Testing

- Created testing workflows using Selenium WebDriver, Jira, SoapUI and Ranorex for UI validation, API testing and defect tracking.
- Prepared test cases, bug reports, expected vs actual results and QA documentation for web/software testing tasks.

ADDITIONAL TECHNICAL EXPOSURE

- Worked with role-based dashboards, booking workflows, vendor/traveler modules, notifications, listing images, reviews and messaging concepts.
- Comfortable preparing implementation plans, software documentation, testing evidence, deployment reports and project explanations for interviews.
- Able to support junior-level tasks in frontend development, Flutter screens, QA testing, API integration, basic server deployment and documentation.

PRACTICAL DELIVERABLES

- Mobile app screens and navigation
- Responsive web pages and portfolios
- Login/signup and form workflows
- API integration and database views
- Test cases, bug reports and API tests
- Git/GitHub project workflows
- Basic CI/CD deployment support
- Technical reports and documentation

PORTFOLIO EVIDENCE

Portfolio and project material are available at sayyab.me, with project focus on Flutter/mobile apps, web development, QA automation, DevOps workflows and product-based software delivery.

WORKFLOW KNOWLEDGE

- Requirement understanding and feature planning
- Flutter screen development and navigation
- Frontend UI refinement and responsiveness
- API/database integration workflows
- Manual QA, Selenium and API validation
- Git/GitHub version control workflow
- Basic CI/CD and deployment troubleshooting
- Monitoring and documentation support

CAREER OBJECTIVE

To start a professional software engineering role where I can contribute to mobile/web development, testing, deployment support and documentation while building stronger industry-level experience.

PROFESSIONAL VALUE

Balanced exposure to Flutter, React, QA and DevOps gives me the ability to understand a project from development through testing, deployment and continuous improvement.
