CORE SKILLS

Software Development Full-Stack Development

Application Development Software Testing

QA Automation DevOps Cloud Deployment

Technical Documentation

TECHNICAL TOOLKIT

Development: Flutter, Dart, React, HTML, CSS, JavaScript, Node.js, Express.js

Backend/Data: REST APIs, MySQL, MongoDB, Supabase, database connectivity

Testing/QA: Selenium WebDriver, Jira, SoapUI, Ranorex, test cases, API testing

DevOps/Cloud: Git, GitHub, Jenkins, Docker, Linux, Nginx, SonarQube, Grafana, AWS EC2

EDUCATION

BS Software Engineering 2022 - 2026
COMSATS University Islamabad

ICS 2019 - 2021
Cadet College Palandri

Matriculation 2017 - 2019
Cadet College Palandri

RELEVANT COURSEWORK

Software Testing, Database Systems, DevOps, Cloud Deployment, Operating Systems, Mobile Application Development, Formal Methods, Software Requirements and Design.

PROFESSIONAL STRENGTHS

- Practical implementation and troubleshooting mindset.
- Clear technical documentation and project reporting.
- Understanding of development, testing, deployment, and monitoring stages.
- Business awareness from e-commerce and product operations.

PROFESSIONAL SUMMARY

Software Engineer with hands-on experience in full-stack application development, QA automation, DevOps workflows, cloud deployment, technical documentation, and e-commerce product operations. Experienced in building practical software workflows, testing application functionality, automating deployment processes, and preparing professional project documentation.

EXPERIENCE

Software Engineer - Academic & Independent Projects

Jan 2024 - Present

- Built application workflows involving authentication, role-based dashboards, booking flows, API integration, and database-backed features.
- Applied QA practices including test cases, automated browser testing, API testing, bug tracking, and defect documentation.
- Implemented CI/CD and deployment workflows using GitHub, Jenkins, Docker, Linux servers, Nginx, SonarQube, and Grafana.
- Prepared professional technical reports, screenshots with captions, SRDS-style documentation, and implementation explanations.

E-commerce Product Research & Operations Assistant

2023 - Present

- Worked on product research, competitor analysis, sourcing research, listing optimization, keyword research, and Amazon VA workflows.
- Developed understanding of marketplace operations, supplier evaluation, product positioning, customer-focused listings, and online selling workflows.

SELECTED PROJECTS

TravEra - AI-Based Travel Planning & Booking Platform

FYP / Product Project

- Designed traveler and vendor workflows for AI-assisted itineraries, listings, bidding, bookings, reviews, messaging, weather, local events, and emergency support.
- Prepared SRDS documentation, system modules, user/vendor flows, UI screens, and implementation planning for a full travel marketplace experience.
- Designed marketplace-style vendor hub concepts covering trip requests, service listings, booking status, earnings, and reviews.

Software Testing & QA Automation Projects

Testing / QA

- Completed QA work using Jira, SoapUI, Ranorex, and Selenium WebDriver for defect tracking, API validation, UI automation, and browser-based testing.
- Created structured testing reports with execution evidence, expected vs. actual results, defect documentation, and tool-based screenshots.

CI/CD Pipeline & Cloud Deployment Workflow

DevOps / Deployment

- Created deployment workflow covering GitHub integration, Jenkins builds, Dockerized services, SonarQube quality checks, Grafana monitoring, and server troubleshooting.
- Practiced Linux server configuration, Nginx setup, container orchestration, pipeline debugging, and monitoring dashboard interpretation.

PORTFOLIO EVIDENCE

- Featured reports prepared for TravEra SRDS, Software Testing/QA Automation, and CI/CD Cloud Deployment.
- GitHub and LinkedIn profile updated to showcase software engineering projects, DevOps workflow, testing reports, and product documentation.
- Target roles: Software Engineer, Junior Full-Stack Developer, QA Automation Engineer, DevOps Intern.
